

VENETIAN BLINDS

A FAVOURITE TRADITIONAL SHADING METHOD

Indoor aluminium blinds provide continuous control of the amount of light in the interior. They protect from the sun and curious neighbours. They are suitable practically for any type of window. Attractive thanks to their affordability and simple maintenance.

Everything made to measure and with a 4-year warranty.

VENETIAN BLINDS

Suitable for apartments,
houses, offices, restau-
rants or banks.

Protect against the sun
and curious neighbours.

An affordable shading
solution. You can choose
from different colours or
imitations of wood.

Safety is guaranteed by
a child safety lock.
They are characterized
by minimal maintenance.

Types of venetian blinds

At first glance, the
individual types
of venetian blinds
differ only in small
details, such as for
example the upper
profile's end shape.

HARMONY

SUPER

EKO

MONO SC

INT-35 / INT-50

Types of slats

The aluminium slats have a standard width of 25 mm and you can choose between a material thickness of 0.18 mm and 0.21 mm. On the MONO SC and INT-35 blinds, the slats are 35 mm wide, in the INT-50 version, the slat is 50 mm wide.

Installation options

Harmony and Super blinds can be installed on both the window frame and in between-glass. Other types can be installed on the window frame or window reveal.

Colour versions

Everyone can choose from our wide range of colours and shades! If you are unsure of choosing the right colour, visit one of our CLIMAX partners stores. They will show you their colour collections and will be happy to advise you on your choice.

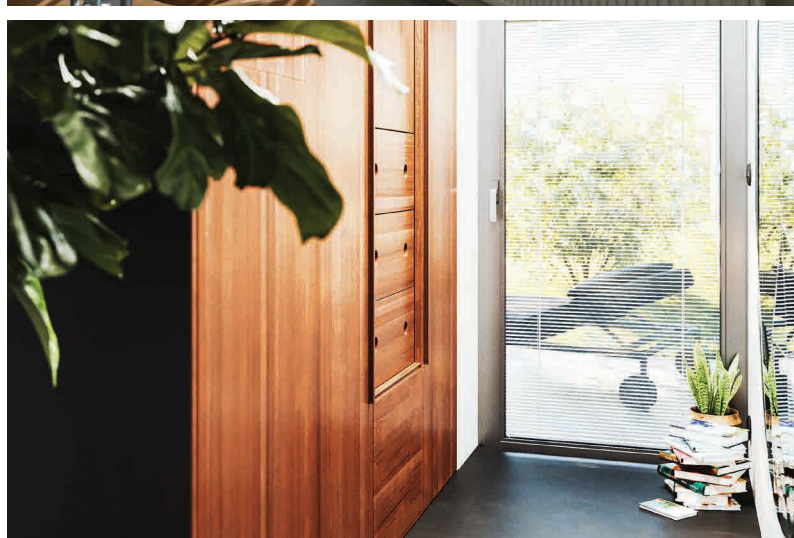

Control types

Motorised – 12 V or 24 V electric motor with controls:

- switch
- remote control

Manual:

- chain, cord, bowden cable, rod.
- The INT-50 can also be operated with a handle
