

INTERIOR FABRIC SHADING

A DECORATIVE ELEMENT FOR EVERY HOME

Interior fabric shading effectively regulates the amount of light in the room and contributes to the atmosphere of every home. It is an ideal addition to external shading. You can choose from a wide range of colours, patterns and fabric types, as well as types of shading.

Every type of shading is made to measure with a 4-year warranty.

INTERIOR FABRIC SHADING

An elegant accessory
for your interior and all
types of windows.

Regulate the amount
of light and complete
the harmony of the entire
space.

Shading of
large areas.

A traditional method
of interior shading.
Improved home privacy.

Main types of interior fabric shading

ROLLER BLINDS

Protects from sunlight and prying eyes. They smoothly regulate incoming daylight in the interior. They are not only suitable for apartments and houses but also commercial buildings.

Thanks to a rich selection of fabrics, you can combine them perfectly with other accessories in the room. They give a living room a level of cosiness, while supporting creativity in the Children's bedroom.

VERTICAL BLINDS

A decorative as well as practical shading element. They are ideal for shading French windows, sliding doors or large glazed areas.

They find their use not only in households and offices but also in schools and hospitals. Vertical blinds are also suitable for partitioning large floor areas, such as corridors, halls, schools and healthcare facilities.

Types of fabric

Semi-transparent

Mainly used for shading, but still partially allows light into the room.

Complete black out (blackout fabric)

Complete blackout fabrics will not release any light into the room. They are used wherever you are after complete darkness.

Fabric roller shutters Varieta Zebra

Also known as "day and night". Made up of solid and translucent stripes. When the full bands overlap, light enters the room over transparent bands.
